

# TALANOA SPACE

Programm Nov. 6<sup>th</sup> – 17<sup>th</sup> 2017

The global challenge of climate change requires worldwide commitment to climate action to mitigate greenhouse gas emission and adapt to the impacts of climate change. It is crucial that civil society, the private sector and local and regional actors engage in climate action. Fiji and Germany therefore shine a light on those that are working hard, independent of their national governments, for climate action and fair development opportunities for all people.

The interactive Talanoa Space is actively shaped by civil society, private-sector representatives as well as regional and local representatives from Fiji and Germany. It will host a range of events and thereby highlight the diversity of these players, outline their activities and encourage discussion and participation. Talanoa Space offers room for open discussions, exchanging of ideas and visions and promoting of cooperation.

COME AND JOIN US!  
THE TALANOA SPACE  
IS LOCATED IN THE  
BONN ZONE  
(EXHIBITION AREA).
